My own State, in her earlier days, understood this system thoroughly. She knew its value. She knew that the labor, pros-

They will endure till the degeneracy of our race shall call down from an indignant heaven a denial of such blessings as a punishment for our sins.

They have the true spirit of fanatical reformers, and they seek power that they may overturn this system of government and build up another system instead.

My friends, we are engaged in no scramble for office. We are stimulated by no ust for power. This struggle touches the question of union or unity. It will decide in the far off future the destiny of our rountry. If our opponents succeed, we

I shall not disparage the ability or the character of any of our opponents. I w uld not, if I could, pluck one leaf from the laurels of General Grant. Do they not declare openly and make it the basis of their creed, that Congress has all power over the right of suffrage in ten States, while it has no such power in the other States? Why is it they build as other States? Why is it they build up these governments upon the basis of the negro vote alone? My friends, divest your-

In these latter days she has wandered from her faith; but when power shall be transferred to another section, and she feels her isolation, she will return to it with a warmer zeal.

If our opponents succeed, we will have first unity, and then despotism and then revolt, and then separation, and Gentlemen, the philosophy of our Government may dictate the subjects upon which I will address you to-day. I do not pretend to be familiar with your local politics, nor do I propose to take part in them. I shall contine myself to those great questions which concern us all alike, and in doing so I will indulge in no partisan bittering so I will indulge in no partisan bittering accustomed myself to the local politics of our past career will be but as the solve of the propose of the p

I have known Mr. Colfax well for many years. I have seen him in possession of great power. He has ever appeared to me as an amiable and estimable gentleman, and, I have no donbt, would perform with dignity and ability the duties of the high office to which he aspires.

I have had pleasant associations with the members of Congress from your State, and I remember with satisfaction that we passed through many years of service in that body, interchanging those courtesies which soften the aspertities of political excitement, indeed, fellow-citizens, my observation of men generally, has led me to expect the most erroneous opinions associated with the purest motives, and the most destructive policy coupled with the highest and noblest aspirations for the public good.

The amount of money collected by taxation in these three years of peace, from July, 1868, reached \$1.534.174.000, and I have it from official sources—the Commissioner of Internal Revenue's reports—for 1866, \$561,572,000, and for

and pay taxes, and be neither fed nor clothed. You cannot carry our Western produce to other countries, because when we have paid our labor, and taxes, and transportation, there is nothing left to send abroad. You cannot carry Southern produce because, under Radical reconstruction, farms have been destroyed and labor systems have been suddenly converted into so many politicians; cotton and rice and sugar have ceased to be staples; a garden has been turned into a desert. A liberal system is the life of your commerce, as it is the hope of our industry. Yet the tariff must be kept high to pay the Interest on the public debt and the daily expenses required by the Republican policy; and, while it skins the rich alluvion from our fertile valleys to make the sterile rocks and barren coast of Massachusetts to smile with plenty, it destroys your shipping and palsies your industry that her manufactures may be protected.

I have stated to you that the last official report of the Secretary of the Treasury shows the debt to be over \$2.600.000 000.—

Of this amount \$1.583.110,000 were in five-twenty bonds. I maintain that these bonds.

report of the Secretary of the Treasury shows the debt to be over \$2,600,000,000.— Of this amount \$1,583.110,000 were in five-twenty bonds. I maintain that these bonds twenty bonds. I maintain that these conds are payable in legal tender notes. The law under which they were issued expressly says that the legal tenders are payable for every debt due from the United States, except interest on the public debt. The bonds say they are payable in legal tender notes; Senator Sherman says so; Senator Morton says so; Thaddeus Stevens said so; the funding bill says so, and the great council of the Democratic party, which met in New York, sald so.

A year ago, when I asserted this doctrine, I had opposition enough to justify an argument, but now I have not. I don't know how it is with you Republicans of Maine, but in Ohio and Iudiana the people are so anxious to get on with the theory that they threaten to push me off my own platform. A year ago the leading men of the Republican party called us Concerbeaks and trait. lican party called us Copperheads and trait-ors; now they say the theory is true, but that it is altogether impracticable. I say it is not at all impracticable. Pay these bonds as they become due. Save the inter-est; save the premium on gold. The National Banks have out a circulation of \$300,000,000, secured by United States bonds. Of course you understand

very well their plan of operation. Three men conclude to go into the banking busimen conclude to go into the banking busi-ness, and, having the necessary capital—in greenbacks—purchase \$100,000 worth of bonds. They deposit these bonds in the Treasury, where they draw their six per cent. Interest. They get ninety per cent. In bank notes, and they come down here and loan these national bank notes at ten, fifteen or twenty-five per cent, according as they may be able to extort from the ne-cessities of the borrower. The Government pays six per cent. in gold to these gentlemen for the burden of lending money at twenty per cent. Break up this system, call in this circulation and issue greenbacks in its stead. Take up \$300,000,000 of bonds, save \$18,000,000 in gold, annually annually annually the Government in activities. expended by the Government in paying interest. This will reduce the debt, reduce syour interest, and enable you either to reduce your taxes or increase your payment the next year.—Your income is at least five hundred millions a year. I say to you, be economical, be honest, let the stealing be stopped, let robbery be punished as it deserves. Expend one hundred and fifty millions a year. That is as much as President Buchanan expended, and far more than Jackson expended during any four years of his administration. Add one hundred and fifty millions tor interest, and yet you have more than two hundred millions a year, and that increased by a large amount with which to pay off the public debt. In this way it can be paid, every dollar of it. principal and interest, by the time it becomes due, without adding a cent to the care that the angelic choir announced to the shepherds in the field, "Peace on earth, good will to men."

Are you content with the prospect of for-ever paying to the tax-gatherer all you earn beyond a mere subsistence? Expand the debt, reduce the interest? An essential step at this time is to re-

store the prosperity of the Southern States. They constitute a great agricultu-ral community. As producers their inter-ests are identical with yours. Their staples will furnish business for your mercan-tile enterprise, and they will furnish wealth for us all. They ought to pay their share of the taxes and of the public dect. They can do it well and they will do their part easily, if order is once more established in their midst, so that he who soweth may hope also to reap. Every instinct of selfish ness, as well as of patriotism, demands that this policy of dread and oppression shall cease, and that these States be restored to their rights and the people to their liber
